

WATCH TELETYPE . . .

for new developments to meet message and data communication needs. An already impressive record of firsts promises a future of more ingenious mechanisms, faster page printers, more versatile tape apparatus.

That's just one of the reasons why Teletype equipment

is being applied every day in different ways for

business and industry. Another reason is that

Teletype makes communications equipment

for its parent company, Western

Electric, Bell System affiliates,

and others who require the

utmost reliability at the

lowest possible cost.
